

Are you tired of filling up your gas tank? Does the commute to your workplace cause you unneeded stress? Why not do something about it?

Solution: **Share the Ride NC!**

What is it?: A **FREE** program provided by the Department of Transportation that allows you to enter your information into a computer database. Then you can quickly and securely find others who share similar commutes and work hours. Setting up a carpool can save money on gas, reduce your stress level during your commute to work, and will help keep our air clean!

How to get started: Go to

www.sharetheridenc.org and enter your information. It doesn't take long, it's free, and it could save you money and stress while you do your part to keep our air clean. **For more info go to www.airtrust.org or call the Clean Air Community Trust at (828)258-1856.**
